Workshop to prepare the visit

#100tífiques

WELCOME TO THE
#100tíiques WORKSHOP!

#100tíiques

In this session you will learn
about the research your
colleagues are doing

#100tífiles

And you will help them prepare
the visit on February 10

#100tífiques

Let's get started?

#100tífiques

Your "Master" will guide you

If you have not yet chosen your "Master" for today's session, remember:

- Must be able to share screen
- Must have experience in 100tifiques
- Wants to do it :-)

#100tifiques

Your "Master" will guide you

- Give the floor
- Time control
- Start discussions

#100tífigues

Tell me about your research

Make a **5-minute** summary of what you will explain on the 10th at the educational centre.

- What is your research about (in a couple of sentences)
- What will you explain to the students: how will you introduce the research topic, etc
- Science communication tools ([see tools](#)) you will use
- Possible dynamics for interacting with students
- A (very short!!) look at the presentation you will be using

What do the others do?

- Write down what you found more interesting about the presentation.
 - What is the main message/s?
 - Has she used any of the tools to communicate science?
- Come up with ideas to suggest to your colleague

Discuss!

The "Master" will give you the floor to be able to comment for on your colleague's presentation for 5 minutes.

I'm sure any suggestions you can think of would be greatly appreciated!
